L8MS — Risk

Legionella Risk Assessment Software

L8MS - Don't let it all get on top of you.

L8MS - Risk

Independent Legionella Risk Assessment software specifically designed to speed up the process of producing a legionellosis risk assessment report. New Microsoft® Word reports and BS8580 guidance have been incorporated.

We believe L8MS Risk delivers: -

- **Speed**—the time to produce a Legionella risk assessment report impacts significantly on the total time required to complete the job. L8MS Risk reduces the report writing time. Uniformity, multiple assessors deliver reports with the same structure.
- **Replication,** reliably producing multiple reports using multiple assessors requires strict control of templates and significant effort distributing standard paragraphs and maintenance of templates
- **Versatility**—The ability to create on-going record keeping logbooks from the risk assessment assets already entered.

Key Benefits:

- **Web based**— There is no local software to install and assessors can work from any internet enabled location.
- **Pre-built report sections—** Use our report modules, define the print order and let L8MS Risk fill out sections like corrective actions from the survey information (ordered by risk rating) and layout a fully editable Microsoft® Word document .
- **Off-line surveys**— Assessors can fill in re-useable surveys containing built in drop down options in remote locations uploading when internet access is available.
- **Site specific control schemes**— Automatically generated, once entered into the assessment L8MS Risk will produce a site specific list of tasks with locations.

Is my data safe?

Your records are held on high specification servers in 3rd party dedicated secure data centres. Our supplier (1&1) guarantees 99.99% uptime, and are confident in this guarantee as they have backup generators, multiple hard drives, dual routers, cooling systems and gel battery power banks & industry-leading 130Gbit Connectivity. 24/7 monitoring by Internet specialists, 150+ permanently recording video cameras, Safety air-locks, protecting up to 30,000 servers. "The largest and most advanced web hosting arena in the world."

On-site Survey

We know when you are in a plant room it's hot sticky, dirty and all you want to do is get the job done and get out. We tried PDAs and there just too fiddly, laptops too bulky and tablets don't like rain! A piece of paper just can't be beaten, L8MS Risk comes with a survey sheet so you can print it as an aid memoir for site, scribble on it, even use the back for a sketch.

Survey write up

Surveys are recorded in Microsoft® Excel spreadsheets with the option to utilise standard answers and recommendations from drop down menus where applicable. Use them or just type, edit or paste in more specific answers and recommendations. Save the survey and use it again for the next rusty, galvanized cistern with no lid, just changing the answers that are different.

Microsoft® Word Report

Once you have completed the surveys let L8MS Risk deal with the job of pulling together a report using a company defined report order & content. Imagine all the recommendations you made in the surveys being automatically added to a corrective action report in risk order, every shower, infrequently used outlet and dead leg identified in the asset register automatically added to a, self generated, site specific control scheme. Upload photographs with comments and let L8MS Risk do all that formatting & sizing. The Microsoft® Word output allows final editing and polishing, cover pages and a table of contents if required.

Legionella Record Keeping Software

If you need to set up a site specific Legionella record systems it is surprising how long it will take. Having used L8MS Risk you are now in a position to use L8MS Mange our Legionella record keeping software. At the touch of a button every location will be set up with a monitoring and inspection schedule. You just need to say when to start and allocate the tasks.

L8MS Consultancy

We can work with you from training an assessor to proof reading your surveys. The great advantage of using an online system means that should you request it we can work with you on the actual survey live, in real time.

So why do customers use L8MS Risk?

"…the system was chosen because it is based around the L8 requirements and assists our engineers in undertaking detailed and accurate Legionella risk assessments to the standards required by legislation and provides uniformity across our business. We recommend the implementation of L8MS Risk & L8MS Manage within all water hygiene proposals."
