Legionella Management Systems

L8MS BRS Mobile

Software systems that work hard
so you don't have to.

2021

	Future	Due	Assigned	In Progress	Completed	Missed	Nonconformity	Signed Off
Calorifier Temperatures (Group)								
Outlet Temperatures (Group)								
Drinking Fountain service								
Shower Clean and Disinfection								
Drinking Fountain filters								
Legionella samples taken								
Calorifier Inspection (Internal) Off-line								
Cistern inspection								
TMV In-Service check								

L8MS-BRS-Mobile

allows on-site collection of water system monitoring & inspection without issuing work sheets or record forms. For those dealing with large numbers of test or inspection points the reduction time setting up job sheets, printing and reporting visits can be very significant.

All tasks in L8MS BRS can be allocated to a mobile worker/individual, these tasks can then be collected on any Android (v4.1+) or iOS (12.0+) device. A mobile worker can collect service visits (using WiFi or Mobile data connection) available offline once they have been downloaded.

Site information offers gps co-ordinates to work with the devices map function, service visit start and finish times, specific tests and inspections required for each asset, photograph collection of issues with comments and signatures for both service provider and engineer. **A test specific job sheet for every site!**

Keep it simple

Sticking to a small purpose built application that runs on Android devices has allowed many of our clients to provide engineers with a simple phone on contract with very limited addition running costs.

LCA Section 3—Control

L8MS-BRS & BRS-Mobile goes along way to help you demonstrate a system that controls the delivery of service, creates suitable records, identifies out of specification results and raises non-conformities directly available for clients to view and action.

So why do our customers use L8MS-BRS-Mobile?

“...if you collect results on paper they require reviewing to find the poor readings, and then action reports must be raised. L8MS-BRS-Mobile does this with no duplication of effort”
